

Postsecondary Programs

Title: Federal Perkins Applications

Technical Colleges are required to submit Local Annual Applications each year to apply for funding under the Carl D. Perkins Vocational and Applied Technology Education Act Amendments of 1998 (Perkins III). Title I funds reserved for postsecondary programs are distributed based on criteria established under Section 132 of Perkins III. Technical Colleges must qualify for a minimum of \$50,000 or join a consortium in order to be eligible to receive Perkins funds.

The Local Annual Applications are mailed to Technical Colleges in late April of each year. The Postsecondary Formula Distribution is calculated in mid-May based on information received from the Technical Colleges on the Form CP-11, *Postsecondary Professional-Technical Federal Formula Form*. Technical Colleges are notified of their funding levels when the formula calculation has been completed.

Once the Local Annual Applications are received by the Division, the preliminary review process is completed within thirty working days. If deficiencies are noted during the review process the Technical College is notified in writing. A funding authorization letter is sent to the Technical College when the applications are approved.
